Karl Elsener

Soldier's knife
1891

Officer's- and Sporting knife
1897

OVER 125 YEARS TRADITION AND EXPERIENCE

In 1891 the first soldiers' knives were delivered to the Swiss Army. In 1897, when Karl Elsener created the now legendary «Swiss Army Knife», he could never have imagined how it would become a worldwide icon for quality and multi-functionality.

Hundreds of companies outside of our trade, have used the «Swiss Army Knife» in advertisements as a symbol to promote the quality and versatility of their own products or services.

The multi-function tools of Victorinox solve problems, fulfill the highest standards and appeal through their understated elegance. They have been designed and created to benefit people.

With an established brand such as Victorinox, your promotion will be successful, impactful and most sustainable.

Additional information can be obtained on our homepage www.victorinox.com under the heading «Corporate Markets».

The logos and inscriptions shown on the next page serve only for illustrating the various forms of inscriptions possible and are the property of the companies concerned.

Victorinox Travel and Business Gear

Based on the unique features of the Original Swiss Army Knife, Victorinox offers different collections of Premium Travel and Business Gear. Emphasis was put on excellent resistance to wear and tear, unrivalled functionality and refined design.

Using the latest benchmark technologies sets new standards and provides unsurpassed performance.

Special catalogue available on request.

Print Processes

For high-quality products, which are sent around the world as image bearers, the inscription must also be at the same high standard. With our large variety of processes we guarantee that your advertising statements can be reproduced according to your wishes.

Tamponprint

Tamponprinting is able to reproduce in contour signets, logos, inscription, images and even photographs sharply and cleanly. On the one hand, we use a spot color process (48-pitch screen) with up to six colors and, on the other hand, we use a four color photographic print process (CMYK, 54-pitch screen).

Protective Lacquer

A Victorinox tamponprint inscription on cellidor handles is protected with a high gloss protective lacquer (with the exception of the Classic models with LED, laser or ballpoint pen).

The purpose of the hard lacquer is to provide the already durable imprint with greater resistance to abrasion and chemical substances.

This process is environmentally friendly and the lacquer is food safe.

Engraving

A tool cuts the font into the material. For plastic surfaces, the engraving is then filled with a white contrasting color. Suitable for small runs, individual names and short phrases without logos (special letter possible). For diamond engraving on the SwissTool, logos and inscription are also possible.

Colors: White contrasting, colored filling for plastic surfaces. No additional colors for steel (Swiss-Tool).

Etching

Inscription on metal parts in an electrolytic way (electrolyte and etching current). Suitable for logos with fine lines or larger surfaces, as well as narrow and bold fonts. Very durable.

Color: anthracite dark gray

Inscription Artwork

Please provide your inscription artwork in one of the following forms:

Artwork for company logos

Fonts must be converted to paths. The colors must be defined precisely with Pantone, RAL or HKS numbers.

Image files for photographic prints

The resolution of the image file must be 300 dpi and provided full size (1:1). The file may be in RGB or CMYK color space.

Design suggestions

Design suggestions may be produced in Adobe Acrobat, QuarkXPress, and Adobe InDesign, but they must be specially prepared for tamponprinting.

The Victorinox emblem together with your advertising message!

We recommend that you also use our Victorinox emblem whenever possible together with your advertising message. This distinguishes the quality of our products in an unmistakable way and works favorably towards the desired image transfer. The Victorinox emblem can either be used on the front side or the back side, but may only be used in the standard position. If the emblem is not desired, this must be stated clearly when placing your order.
